

In development or ready for market - it's all here

The United Distributing Company
(The Worldwide Distributor)

MONSTER DROP

BENCHMARK'S Monster Drop sees players time the drop of the high-energy ball so it falls through the jackpot, the mystery value or ticket win values. If a ball drops in an add bonus ball hole, balls are reserved until, if they make it in a drop bonus ball hole, it's multi-play. If players bounce a ball up onto the platform and into the monster jackpot hole they win a huge two-player cumulative jackpot.

TRAP DOOR

THE Trap Door merchandiser from Benchmark sees players skilfully stop the spinning light in the win zones, which then cause the trap door to crank open, until finally, the prize falls through the chute. Then, to reload the prize, a claw automatically seeks out and grabs another toy and drops it on the trap door ready for the next player.

TOUCH FX SINGLE

UDC will present Adrenaline Amusement's ticket redemption game Touch FX, featuring Fruit Ninja, as a single-player unit at this year's Park Avenue open day. Representing a new era in arcade video gaming, it features unlimited future game control applications and refreshed game content.

GO GO GRAND PRIX

A HYBRID concept that sees the evolution of the slot-car toy/hobby genre fused with the latest video game technology, Go Go Grand Prix is a cross-generational, four-player game aimed at families and children of all ages. Testing of the machine has shown that over 20 per cent of play comes from four player group play and 50 per cent from three or more players. It has a game turnaround time averaging under two minutes and is all about being different to anything else out there. Distributed by Electrocoin, it is available in four different configurations and it can be operated as amusement only, customisable tournament mode, midway style redemption mode and regular redemption mode.

COUNT DRACULA

COUNT Dracula is a spinning reel-based ticket redemption machine from UDC that features spooky Dracula and a monster theme. It features switchable percentage controls and the price of play is 10 pence.

CRAZY WHEELS

A HIGHLY stylised two-seater sports car children's ride from UDC, with 'pimped-out' paint work and crazy wheels, Crazy Wheels features interactive sounds, sturdy motion base, with an optional pressure sensitive mat to stop all motion and a multi-coin mechanism for price of play flexibility.
